### ***Double Patenting***

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-20 of prior U.S. Patent No. 6, 856, 758. This is a double patenting rejection.

Regarding claim 1, the subject matter of claim 1 can be found in patent claim 1. Patent claim 1 recites a method of recording a television program comprising: receiving a television signal; designating a recording start time and a scheduled recording end time; beginning a recording of the television signal at the recording start time; examining the television signal to detect a commercial group proximate in time to the scheduled recording end time; ending the recording at the scheduled recording end time if the commercial group is detected, otherwise extending the recording.

The subject matter of claims 2-20 can be found in patent claims 2-20.
